Figure A: Public Health Actions in Response to Confirmed Case of COVID-19 in a School

Student, staf or other person who has been in the school confirmed to be COVID-19 case

Confirmed case interviewed by public health to determine how they were infected and who they were in close contact with while infectious

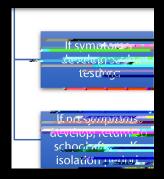

If confirmed case was not infectious when they attended school, the school will not be contacted.

If confirmed case was infectious while they attended school OR it is determined that they were infected at school, public health will inform the school administrator and:

Request class, learning group and bus lists

Determine if there are any confirmed close contacts

Confirmed close contacts are asked to self-isolate for 14 days from the last exposure

Coordinate with the school/district to develop and implement a communications plan, including who should be notified,
